Command Center for Db2[®] Learning Path

BMC AMI Command Center for Db2® Learning Track: DBAs and SYSPROGs

Recommended for: Database Administrators, System Programmers

Product versions: 12.1, 13.1

Command Center for Db2[®] (previously Workbench for Db2[®]) provides secure self-service for Database Administrators (DBAs), System Programmers (SYSPROGs), and Application Developers with an intuitive, web-based interface to manage Db2 databases and data. It presents Db2 database information in an intuitive, graphical user interface (GUI), making it easier to understand and faster to manipulate. It maintains security by retaining all the access restrictions of the mainframe. It also simplifies development for optimized Db2 applications.
