

# BMC AMI Storage Management Learning Track: Storage Administrators

CRT Certification    
 ILT Instructor-led Classroom/Online  
WBT Web-based Training    
 ASP Assisted Self Paced

## About the Product:

**BMC AMI Storage Allocation:** Streamlines storage allocation, reduces the storage needed for data allocations, and ensures that jobs complete successfully the first time—meeting the demands of digital business while improving staff productivity and reducing costs.

**BMC AMI Storage Reporting:** Provides an in-depth understanding of current and historical trends in storage performance. It monitors, analyzes, and automates tasks to protect the health of storage subsystems.

**BMC AMI Storage Automation:** Simplifies and centralizes the management of IBM® z/OS® storage automation and exception processing across SYSplex and multi-LPAR environments.

## About the Training Target Group – Storage Administrator:

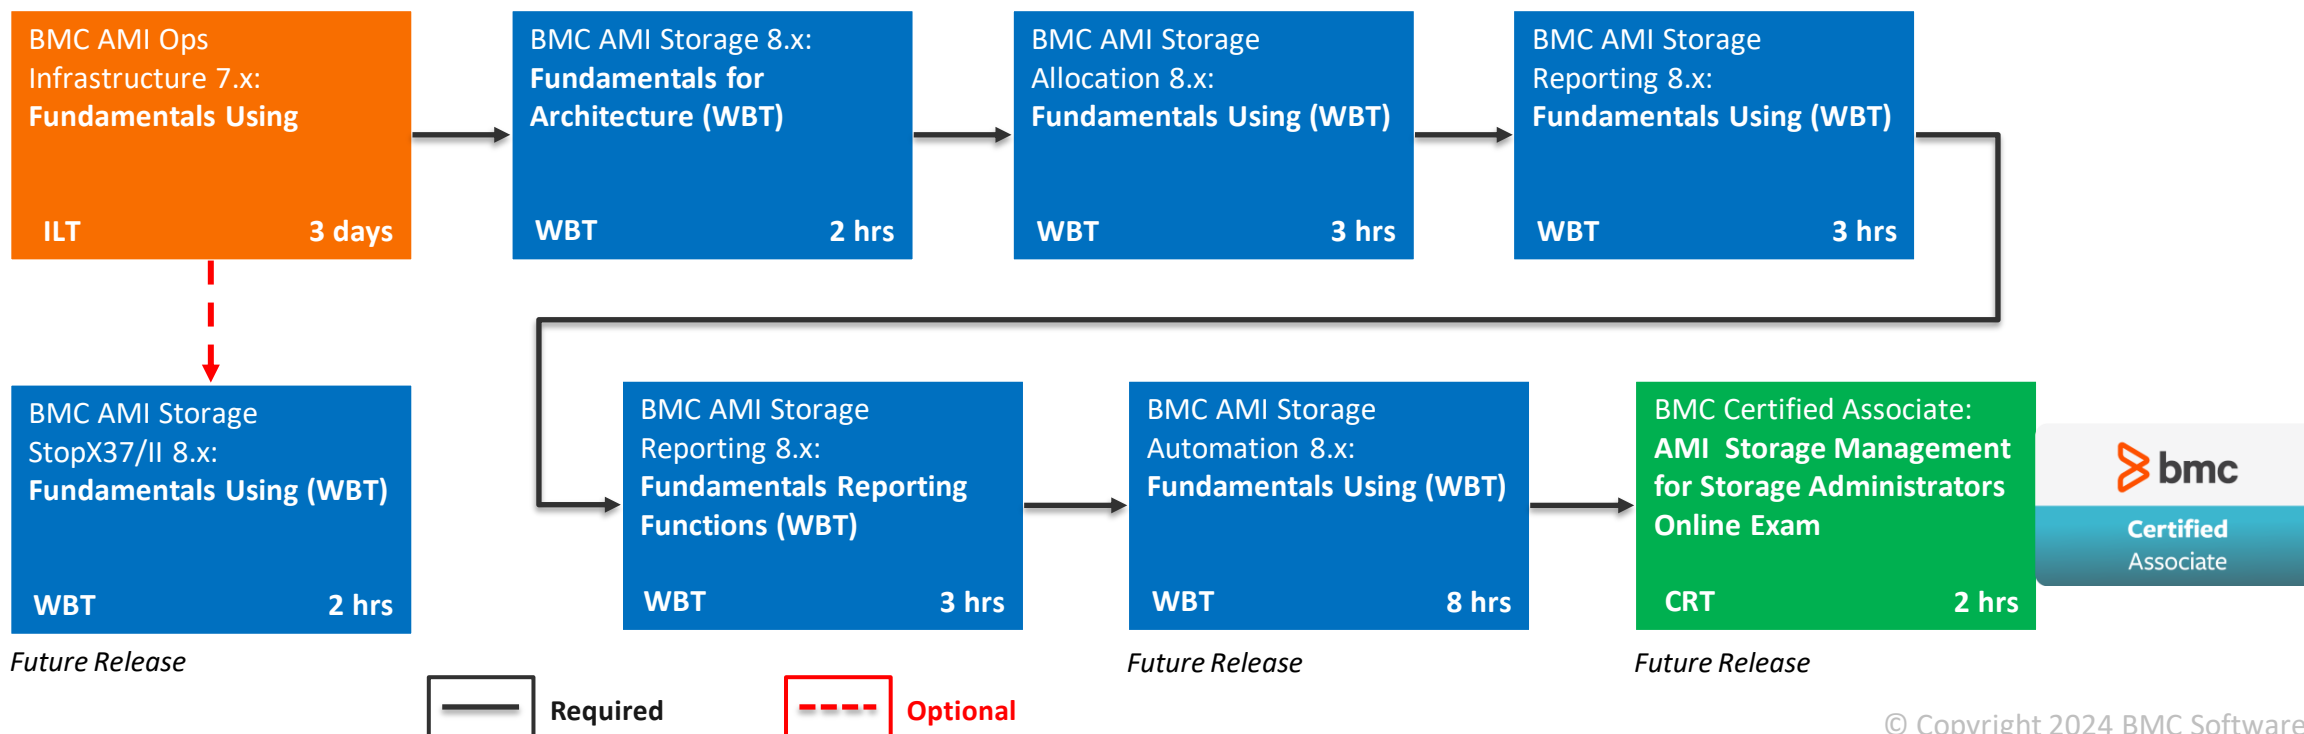

- Plan, review, and implement changes related to the system storage
- Manage the health of storage subsystems

**Recommended for:** Storage Administrators

## Training applicable to product versions:

- BMC AMI Storage Allocation 7.9, 8.0, and 8.1
- BMC AMI Storage Reporting 7.9, 8.0, and 8.1
- BMC AMI Storage Automation 7.9, 8.0, and 8.1

## About the Product:

**BMC AMI Storage Allocation:** Streamlines storage allocation, reduces the storage needed for data allocations, and ensures that jobs complete successfully the first time—meeting the demands of digital business while improving staff productivity and reducing costs.

**BMC AMI Storage Reporting:** Provides an in-depth understanding of current and historical trends in storage performance. It monitors, analyzes, and automates tasks to protect the health of storage subsystems.

**BMC AMI Storage Automation:** Simplifies and centralizes the management of IBM® z/OS® storage automation and exception processing across SYSplex and multi-LPAR environments.

## About the Training Target Group – System Programmer:

- Automate storage-related transactions like allocation and deallocation
- Create automation to minimize storage utilization and high availability

**Recommended for:** System Programmers

## Training applicable to product versions:

- BMC AMI Storage Allocation 7.9, 8.0, and 8.1
- BMC AMI Storage Reporting 7.9, 8.0, and 8.1
- BMC AMI Storage Automation 7.9, 8.0, and 8.1
